Hi-Res Drum scanning is the best possible method to digitalize your originals for archiving and producing exhibition quality prints. We mount your films with fluid that avoids Newton rings and helps hides scratches and dusts. Drum scans are the very best way to extract every bit of detail from your originals. Originals up to 20" x 24".

Imacon scans are the second best way to go, with it's virtual drum technology. With Imacon scans, no fluids are used. Scan file sizes up to 200mb. Films from 35mm up to 120mm.

Photo Print Scans are a easy way for you get you prints onto DVD or to the Web. Prints up to 8 x 10 only.

Call us at 415-409-8610 to discuss your project or to find out more information about what we can offer you at New Pixel Imaging. Email us at, contact@newpixelimaging.com.
